SuperSwitch™ Battery Disconnect Switch

Installation

1. This switch cannot be used on vehicles with full-time power required computers.
2. Determine the mounting location for the switch.
3. Disconnect the positive and negative battery terminals. Make sure the switch is in the "off" position.
4. Select which cable (positive or negative) the switch will be used in. Ensure you have adequate cable length.
5. Splice into the cable and use 3/8" eyelets attached to the cable ends. Attach cables as shown below.
6. Check all connections.
