

**HD Engine/Transmission Cooler Bracket Kit**  
(fits all PW Oil Coolers 80010/80016/80025/80040)**Includes:**

- 2ea. Laser cut, CNC bent powder-coated brackets.
- 1ea. 3M™ adhesive backed vinyl foam insulating tape strip.
- 8ea. Stainless Steel dome head bolts, washers and nylon locking nuts.

Note: We recommend the use of 2 brackets (1 kit) per cooler. This will provide secure mounting when the cooler is at full weight with fluid.

**Assembly:**

- 1) Apply two evenly spaced 2" pieces of the foam strip to the top and bottom of the cooler.
- 2) Attach the bracket as shown using the supplied bolts, washers and nuts. (4 per bracket)  
Do not over-tighten as it may put undue stress on the cooler body.
- 3) Repeat on the opposing side.
- 4) Install -10AN ORB fittings (not supplied) as required.
- 5) Mount cooler assembly using the 4 pre-drilled 1/4" holes in the desired location.
